SECTION 4: First aid m	neasures
• 4.1 Description of first aid r	neasures
General information	Remove contaminated clothing immediately. Consult a doctor if symptoms occur. Move affected person to fresh air.
· After inhalation	Supply fresh air; seek medical advice if symptoms occur. If unconscious, place in recovery position and seek medical advice.
· After skin contact	In case of contact with skin, wash carefully with plenty of soap and water. Consult a doctor in case of skin reactions.
· After eye contact	Rinse opened eye for several minutes under running water. Call a doctor immediately
· After swallowing	Rinse mouth with water. Never give anything by mouth to an unconscious person. DO NOT induce vomiting. If symptoms persist, consult a doctor.
 4.2 Most important sympton and effects, both acute and 	
delayed	Advice for the doctor: Elementary aid, decontamination, symptomatic treatment.

SECTION 5: Firefighting measures

- · 5.1 Extinguishing media
- · Suitable extinguishing agents Use fire fighting measures that suit the environment.
- 5.2 Special hazards arising from the substance or mixture No
 - No further relevant information available.

SECTION 7: Handling and storage

• 7.1 Precautions for safe handling	Open and handle containers with care. Only use in well-ventilated areas (e.g. open construction, outdoor areas), in rooms without air exchange (e.g. closed rooms, underground car parks) ventilation measures are required. are required. Wear suitable personal protective equipment (see section 8). Avoid contact with eyes, skin and clothing. Change contaminated or damaged gloves and contaminated clothing immediately and wash skin immediately. Mix slowly, partially covering the mixing container. Pour carefully and slowly when repotting. Observe the BGBau technical data sheet and practical guide for handling epoxy resins. Open and handle containers with care.
 Information about protection against explosions and fires: 	Ensure sufficient air exchange and/or extraction in the working areas. Take precautionary measures to avoid electrostatic discharges.
 Storage Requirements to be met by 	e, including any incompatibilities
storerooms and containers: · Further information about storage conditions: · Storage class	No special requirements. Protect from frost. 12

	Wash hands before breaks and at the end of work.
	Avoid contact with eyes and skin.
Breathing equipment:	If workplace limit values cannot be complied with by ventilation

Hand protection	with BGR 190.
Hand protection	Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation
Material of gloves	You can find help with choosing gloves on the website https:/
material of gloves	www.bgbau.de/fileadmin/Gisbau/Projekte.pdf
	For example, we recommend the Sol-vex 37-900 protective gloves
	from Ansell GmbH. The breakthrough time of the protective glove
	can be found under point 8 "Penetration time of the glove material"
	The selection of a suitable glove depends not only on the material
	but also on other quality features and varies from manufacturer to
	manufacturer. As the product
	is a preparation of several substances, the resistance of glove
	materials cannot be calculated in advance and must therefore be
	checked before use.
	Nitrile rubber
Departmention times of allowed	Recommended material thickness:≥ 0.4 mm
Penetration time of glove	The brockthrough times of the Selver 27,000 protective slove
material	The breakthrough times of the Sol-vex 37-900 protective gloves are around 8 hours.
	The following applies to all other gloves:
	The exact breakthrough time must be obtained from the protective
	glove manufacturer and adhered to.
	Nitrile rubber
	Material thickness: \geq 0.40 mm
	Penetration time: \geq 480 min

	Butyl rubber:
	Material thickness: \geq 0.5 mm
	Penetration time: \geq 480 min
 Eye/face protection 	Tight-fitting safety goggles.
	Safety goggles.
 Body protection: 	Protective clothing
	Suitable protective clothing should be worn when working with epoxy resins. In addition to normal work clothing (long trousers, long-sleeved shirt or T-shirt), disposable overalls, aprons, overshoes, sleeve protectors etc. may be necessary depending on the activity. Uncovered areas of skin should be avoided as far as possible, even in hot weather. If the work involves kneeling, the lower leg area should be protected by protective trousers.
