SECTION 4: First aid measures

· 4.1 Description of first aid measures

· General information	Remove soiled, soaked clothing immediately.
· After inhalation	Remove person to fresh air, keep warm, allow to rest; if breathing is difficult, seek medical attention.
· After skin contact	In case of contact with skin, wash carefully with plenty of soap and water. Consult a doctor in case of skin reactions.
· After eye contact	Rinse the eyes with open eyelids for a sufficiently long time (at least 10 minutes) with water that is as lukewarm as possible. Consult an ophthalmologist.
· After swallowing	Do NOT induce vomiting. Rinse mouth with water. Medical attention required.
 4.2 Most important symptoms and effects, both acute and

 5.3 Advice for firefighters Protective equipment: 	Wear self-contained breathing apparatus.
SECTION 6: Accidental	release measures
 6.1 Personal precautions, protective equipment and 	
emergency procedures	Ensure adequate ventilation Use breathing protection against the effects of fumes/dust/aerosol.
· 6.2 Environmental	
precautions:	Prevent material from reaching sewage system, holes and cellars.
6.3 Methods and material for	,
containment and cleaning up	b: Absorb with liquid-binding material (sand, diatomite, acid binders, universal binders, sawdust).
	Dispose of contaminated material as waste according to item 13. Ensure adequate ventilation.
[•] 6.4 Reference to other	
sections	See Section 7 for information on safe handling See Section 8 for information on personal protection equipment. See Section 13 for information on disposal.

SECTION 7: Handling and storage

 7.1 Precautions for safe 	
handling	Ensure sufficient air exchange and/or extraction in the work areas. Air extraction is required for spray application. For solid products: Avoid dust formation and dust deposits. Air limit values mentioned in section 8 must be monitored. At workplaces where isocyanate aerosols and/or vapours can occur in higher concentrations, targeted air extraction must be used to prevent the occupational hygiene limit value from being exceeded. The air must be moved away from people. For products containing solvents: Explosion protection required. The personal protective measures described in section 8 must be observed. The protective measures required when handling isocyanates must be observed. Avoid contact with skin and eyes and inhalation of vapours. Keep away from food and beverages. Wash hands before breaks and at the end of work and apply skin protection ointment. Store work clothes separately. Remove soiled, soaked clothing immediately.
 Information about protection against explosions and fires: 	Protect from heat.
	Do not store near heat sources. (Contd. on page 5)

7.2 Conditions for safe storage, including any	
incompatibilities	Keep container dry and tightly closed. Further information on the storage conditions that must be observed for quality assurance reasons can be found in our technical data sheet.
Storage	
Requirements to be met by	
storerooms and containers:	Keep tightly closed in original packaging. Ventilate storage rooms well. Carefully close opened containers and store upright to prevent any leakage.
	Storage temperature >5°C and <30°C
Information about storage in	
one common storage facility:	May be stored together with hazardous substances of other classes up to 200 kg.
Further information about	
storage conditions:	Keep container tightly closed in a well-ventilated place.
