

MC-Tool Rubber (formerly MC-Top Rubber)

Rubber float for Concrete Cosmetics

Product Properties

- Tool for fine and super fine Concrete Cosmetics
- Ergonomic wooden handle
- Made of abrasion resistant rubber

Areas of Application

- For floating of Concrete Cosmetics
 - Especially for fine and super fine Concrete Cosmetics
 - For small and large area fillings
 - For pore and cavity fillings
- For economical floating of fillers without loss of excess material
- For floating of Concrete Cosmetics for exposed concrete quality

Application Notes

MC-Tool Rubber is a special developed tool for the application of fine and super fine Concrete Cosmetic fillers of MC.

Substrate preparation for Concrete Cosmetics

The substrate must be clean, solid, able to bear loads and free from anti adhesive substances.

The substrate has to be pre-wetted so that it is semidry yet still absorbent. When repairing deep damage, honey combs etc. the moist substrate should be treated previously with a primer and after with a coarse filler.

Application

The fine and super fine filler is poured into the measured water and stirred with a slow rotating agitator until it has a lump free, workable consistency. The mixture is then to be applied evenly with the rubber float MC-Tool Rubber.

After the filler has almost set, the surface can be

smoothed with MC-Tool Sponge. First of all the sponge should be pre-wetted so that the surface can be easily emulsified.

Further Information

MC-Tool Rubber is especially for pore and cavity fillings. The soft and abrasion resistant rubber float has been developed especially for individual processing so that light pressure can be applied partial where necessary.

Colour changes may appear during processing!

MC-Tool Rubber should only be washed with clean water.

After treatment

Surfaces treated with MC-Tool Rubber have to receive after treatment as quickly as possible to protect them from fast drying from sun and wind exposure.

Technical Data for MC-Tool Rubber

Characteristic	Unit	Value	Comments
Colour		grey	With wooden handle
Processing conditions	°C	≥ 5	Air, substrate and material temperature

Product Characteristics for MC-Tool Rubber

Equipment Cleaning	Clean water
Storage	Can be stored in closed packs under dry conditions.
Form of Delivery	Carton with 2 rubber floats

Note: The information on this data sheet is based on our experiences and correct to the best of our knowledge. It is, however, not binding. It has to be adjusted to the individual structure, application purpose and especially to local conditions. Our data refers to the accepted engineering rules, which have to be observed during application. This provided we are liable for the correctness of this data within the scope of our terms and conditions of sale-delivery-and-service. Recommendations of our employees which differ from the data contained in our information sheets are only binding if given in written form. The accepted engineering rules must be observed at all times.
